

# Dark fiber for your business

Save on bandwidth and control your company's dedicated fiber!

## SAVE ON BANDWIDTH RENTAL COSTS

By becoming a dedicated fiber tenant, you can reduce your bandwidth rental costs.

- Savings on redundancy
- Savings on backups
- Eliminating signal loss or latency due to sharing with other tenants
- Reducing productivity losses

## DARK FIBER RENTAL SOLUTIONS AT C3F TELECOM

C3F Telecom provides flexible dedicated fiber solutions – tailored to your needs.

- Dark fiber rental programs
- Monthly, quarterly, or annual payments \*
- No minimum fees \*
- Free installation \*

Multiple terminals, high-definition content, shared workspaces, security, backups, IP telephony ... your bandwidth requirements increase continuously.

### Your fiber. Your data. Your safety.

Dedicated fiber offers unmatched throughput speeds. Moreover, by becoming the single user of a band, your data is traveling inside your own network, sheltered from the outside world.

- Unlimited speed and flow
- Single user - dedicated fiber to your business
- Increased data security

### Control your growth

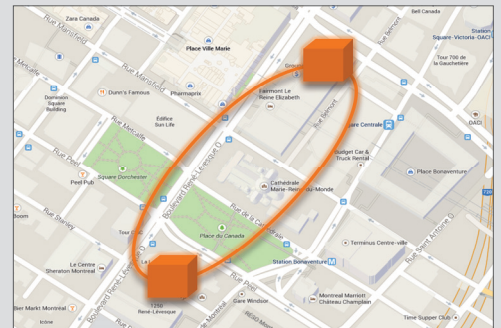

With a dedicated fiber, you can plan the use and growth of your network.

- Control its usage
- Control its growth
- Control equipment
- Centralize costs

### Activation

Your teams can turn your dedicated fiber on according to your business preferences. C3F Telecom also offers:

- Equipment selection support
- Equipment installation and commissioning
- Network maintenance

Example of a dark fiber network downtown Montreal

## Dark fiber network available in downtown Montreal
